

A Viewing Room v.3

21 June to 10 August 2018

A Viewing Room v.3 is an evolving, collaborative installation between the gallery and furniture designer Patty Johnson. Taking the viewing room—a traditionally private space—as point of inquiry, this project offers improvisational proposals for domestic space. By presenting a rotating selection of artworks from inventory, our hope is to provide an environment to re-examine a work's meaning and qualities of relation outside their original context. The documentation below displays a beginning, a place of activation.
